Cancer Research

Cancer is a leading cause of death in developed nations, affecting millions of people around the world. Research into the molecular basis of these diseases can inform the development of life saving new drugs. Boster Bio aims to fill the needs of researchers in this field by supplying high affinity, high specificity antibodies and ELISA kits. Our products are thoroughly validated and guaranteed to work as advertised. Get better results with Boster!

Boster's Guarantee

We guarantee that all Boster products will work as advertised or your money back.

About Boster

Boster is an antibody manufacturer founded in 1993 by histologist Steven Xia. Over the past two decades, Boster and its products have been cited in over 20,000 publications and counting. The firm specializes in developing antibodies and ELISA kits that feature high affinity, high specificity at affordable prices.

Boster Cancer Research Antibodies

Boster supplies only the highest quality research products. Our high-affinity high-specificity polyclonal and monoclonal antibodies are thoroughly validated according to their datasheets. This is our mini catalog of antibody products related to cancer research, sorted in alphabetical order by target gene name.

Anti-EGFR Picoband™ Antibody (PB9016)

The epidermal growth factor receptor (EGFR) is a member of the ErbB family of receptors, a subfamily of four closely related receptor tyrosine kinases. This transmembrane protein is activated by binding of its specific ligands, including epidermal growth factor and transforming growth factor α (TGF α). Mutations affecting EGFR expression or activity could result in cancer.

Recombinant N-terminal domain of EGFR with the expected mol.wt. of ~100 kDa

"I would highly recommend this Boster antibody..."

★★★★★ Excellent

SUMMARY: Anti-EGFR Picoband™ Antibody (PB9016)

"Rabbit antibody PB9016 from Boster was probed for western blot detection of the recombinant N-terminal domain of human EGFR (100 ng/lane). The antibody nicely detected the protein band with the expected mol.wt. of recombinant protein. The antibody appears to be specific since non-specific bands were not detected in parallel lanes with cell lysates lacking EGFR. I would highly recommend this Boster antibody for detection of EGFR with the intact N-terminal domain."

Boster Cancer Research Picokine ELISA Kits

Boster Bio is proud to present our latest catalog of ELISA kit products. Our high sensitivity, high specificity ELISA kits are thoroughly tested alongside our antibody products. This is our comprehensive catalog of our ELISA kits related to cancer research, sorted in alphabetical order by target gene name.

Mouse TNF Alpha PicoKine™ ELISA Kit (EK0527)

Tumor necrosis factor (TNF, TNFα) is a cytokine involved in systemic inflammation and is one of the cytokines that make up the acute phase reaction. It is produced chiefly by activated macrophages, and its primary role is in the regulation of immune cells. As an endogenous pyrogen, TNF is able to inhibit tumorigenesis and viral replication. Dysregulation of TNF production has been implicated in a variety of human diseases including cancer.

"Great TNF alpha Kit"

★★★★★ Excellent

SUMMARY:

[Mouse TNF Alpha PicoKine™ ELISA Kit \(EK0527\)](#)

"This ELISA kit worked as advertised. Wells can be removed as strips, so not everything has to be used. Great product. Results are good and have low %CV. Quick assay kit and cheaper than other companies in my opinion."

Boster's EZ-Set ELISA Kits (DIY Antibody Pairs)

Boster Bio is proud to present our EZ-Set ELISA Kits for cancer research! Each kit provides a comprehensive collection of reagents and materials sufficient to perform five 96-well ELISA assays with our optimized antibody pairs. Do-it-yourself at an affordable price!

EZ-SET KIT COMPONENTS

- ✓ Antigen-specific capture antibodies
- ✓ Biotinylated detection antibodies
- ✓ Lyophilized recombinant protein standard
- ✓ HRP-conjugated Avidin-biotin peroxidase complex

EZ SET ACCESSORY KIT EZA001

- ✓ Antibody diluent buffer
- ✓ ABC diluent buffer
- ✓ Sample diluent buffer
- ✓ TMB
- ✓ TMB stop solution
- ✓ 5x 96 well plates, plate sealers

The Must-Read Guide to Western Blot

How to Become a Western Blot Expert in 4 Days

 Free download at
bosterbio.com/wb-ebook

What is in the ebook?

This guide will teach you everything you need to become a Western Blot (WB) expert, including comprehensive principle overview, insightful troubleshooting tips and more.

✓ Western Blot Principle

Having a solid understanding of how Western blot works significantly increases your success rate. We have everything you need to know from sample preparation to data interpretation.

✓ Optimized Protocol

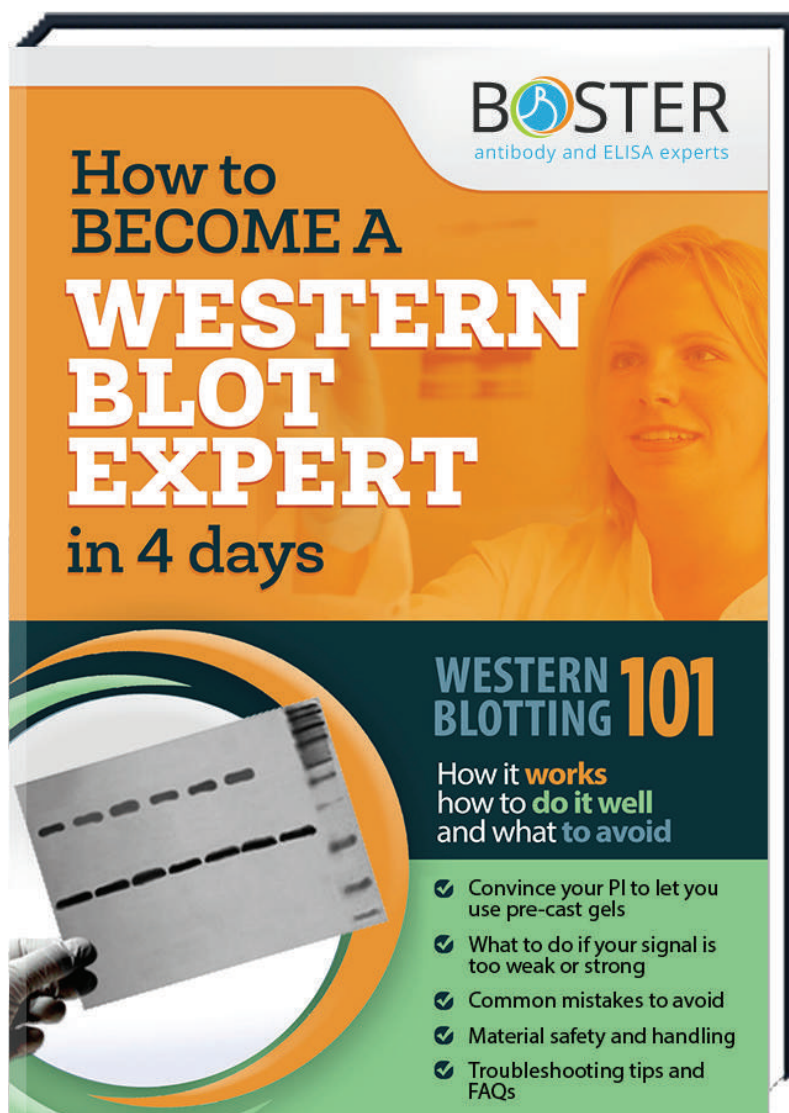

Western blot is complex and tricky in many ways. Our step-by-step protocol will guide you to generate reproducible, high quality data.

✓ 100+ Troubleshooting Advices

Having our comprehensive troubleshooting tips right on your bench side can save you a lot of precious time and headache.

✓ Frequently Asked Questions

Learning from your peers' experiences can bring you novel perspectives and help you avoid common mistakes.

An ELISA Guide That You Cannot Miss
