

FLICA kits have been successfully used with these cells:

Jurkat	Human coronary endothelial cells	U937, a histiocytic lymphoma cell line
HeLa HL-60	PrEC adherent prostate primary culture endothelial cells	Squamous A431 cells head and neck carcinoma
THP-1	Mouse fibroblasts	Adherent human colon carcinoma HCT116
MCF-7	Adherent human pulmonary MRC-5 fibroblasts	Rat brain cortical cells grown on astrocytes as a feeder layer
K562	Adherent Rhesus monkey papaloma tissue	Neuroblastoma cells in suspension
B-macrophages	Adherent lung carcinoma	Keratoconus cells
Live drosophila embryos	Suspension human non-hodgkins lymphocytes	
Live paramecium		
Adherent retinal epithelial cells
